### ASSEMBLY INSTRUCTIONS

### **IMPORTANT**

Please Inspect all items carefully before assembling. If for any reason you need to return this item, you must return it in its original packaging. Assembled items cannot be returned.

Minimum No.of people recommended to assemble this product: Two (2)

Approx. Assembly time: 90 mins

#### HELPFUL ADVICE PRIOR TO ASSEMBLING THE BED

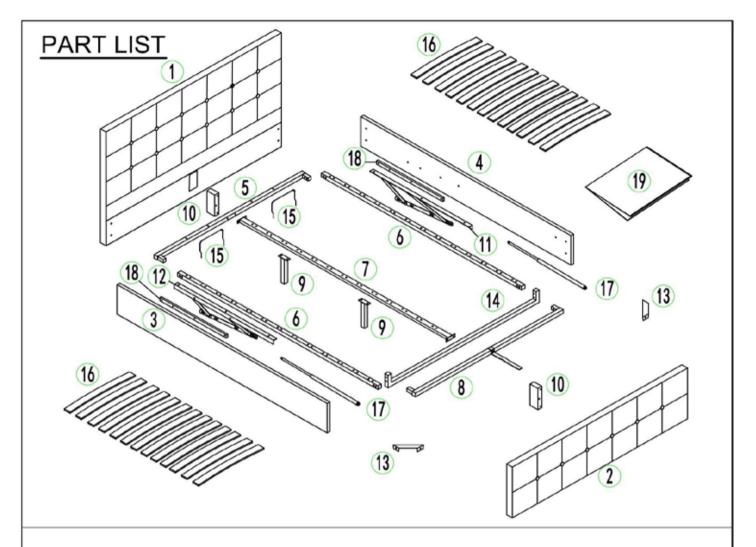

- Owing to the size and weight of the bed, we recommend that it is assembled by two adults, on a flat surface in a room that it is intended for.
- 2) Please Do Not use any tools other than those provided or recommended in these instructions.
- 3) Please Do Not discard any packaging until you have checked that you have all the parts and fittings. Keep all fittings out of reach of children.
- 4) Assemble all parts loosely until advised to tighten. Depending on use, it maybe necessary to tighten the fittings from time to time, So please save your Allen key and Spanner that has beed provided.

#### WARNINGS

- Please ensure children Do Not play in the storage area or try to lift up the metal frame.
- 2) Once assembled, put mattress on frame before pushing it down and only lift up or push down the metal frame with mattress on top.
- 3) Please Do Not stand on the storage base at any time.
- 4) Do Not throw away any of the packaging or the instructions booklet until you have checked all the components and fittings and the furniture is fully assembled.

### **HOW TO USE BED**

When the bed is fully assembled, Lift the frame up using strap on the footboard. To close the frame you will need to place both hands on the horizontal metal bar at the footboard end that is in the air ( one hand in the centre of each of the two rows of slats). The bed will only work if this done centrally. Apply pressure to close the bed. Do Not try to close from the side or any other way. Please also note the gaslift lift arms do not move up and down on their own and only work if the bed is fully assembled and is assembled correctly and will only work normally with mattress on the frame.

# Step 6

Turn bed on its side and paste non woven fabric to the botton of the bed

## **IMPORTANT NOTICE**

## OTTOMAN OPERATING INSTRUCTIONS

Once your bed frame is completely assembled the slat frame will not operate correctly unless a mattress is placed on the slat frame. Place the mattress on the slat frame whilst it is in the closed position. Use the strap handle and pull up to Open the ottoman. To Close use 2 hands at arm's length to push down the bed frame end, in between the 2 rows of bed slates. DO NOT use the strap handle to close the ottoman.

PLEASE NOTE - it takes a lot of force to make the initial movement to close the ottoman. This is a design feature of the product so the slat frame does not fall shut down involuntary. The nearer the slat frame to being closed the easier the slat frame will move downwards. When the ottoman is almost shut it will close completely under its own and mattress weight.

When lowering the slat frame for the first time, take care to make sure it does not rub unevenly on the inside face of the side rails. If it does, the bed has been assembled slightly out of square. This can be aligned by moving the foot end of the bed slightly to the left or right whilst leaving the head end stationary.

### **PISTONS**

The pistons used in the construction of this product are extremely strong and cannot be operated by hand when taken off the ottoman. All pistons are tested for correct pressure and operation before being attached to the slat frame,

Initially it might appear that the pistons are very stiff when opening and closing the ottoman - THIS IS PERFECTLY NORMAL.

After operating the ottoman a few times, the movement of the pistons and the opening and closing of the ottoman will become easier.

### **WARNING**

For the safety of yourselves and others, please ensure that:

- Use only the strap handle when lifting up the slat frame.
   Failure to comply with this warning may result in injury and finger entrapment.
- The handle is attached and always left visible on the outside of the bedstead frame.
- The metal slat frame is fully raised in full 'Up' position before using the ottoman space, otherwise the metal slat frame could close (fall) or open (spring up) causing injury.
- Children and pets MUST NOT be left unattended when the frame is in the lifted 'Up'
  position as they could become trapped inside the ottoman space.
- Please keep children and pets away from the ottoman bedstead whilst opening and closing the slat frame to avoid injury.
- The items store under the bed i.e. the top of an item must not touch the underside of the mattress metal frame base or it may get damaged.

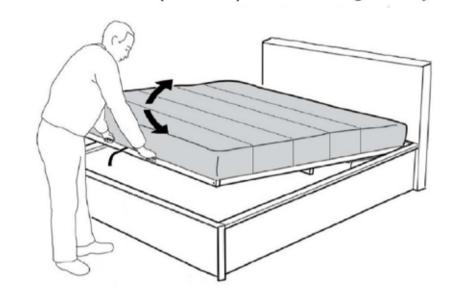

## Hints and Tips

### Failure to do so may result in injury.

To close the ottoman, always use two hands at arm's length to push down on the bed frame end, in between the 2 rows of slats (as shown below) to close the bed slat frame.

To open, lift up using the nylon strap on the bed end. You must always ensure the mattress is on the bed frame before lifting to open and close the bed frame.

The weight of the mattress loaded on the frame helps to close the bed frame easier and with less effort, also keep the frame in closed position until it is pulled upwards using the nylon strap

# **Hints and Tips**

Failure to do so may result in injury.
